of
SUNSHINE AND CHARM

From Eleanor H. Porter's Novel
"Pollyanna"

No matter how badly off you think you are, no matter how horrible your troubles, pile up against you, be glad that things are not any worse. There's always something to be glad about. See Mary Pickford in 'Pollyanna'

MATINEE SATURDAY AT 3 O'CLOCK

CLARESHOLM LOCAL NEWS

Two brothers of Lotus Norvis arrived on Monday for a visit with him.

Remember the Fordson Tractor Demonstration on R. E. Soyer's farm, Monday, May 30th, at 2:30 p.m.

Owing to engine trouble it has been possible to get but a part of the copy handed in into type in time for this issue of the Review-Advertiser.

Mrs. Vanhorn and daughter left this week for Vancouver where they expect to spend the summer in the hope of benefiting Mrs. Vanhorn's health.

A woman can start more excitement than a troop of tigers. If you don't believe it see Ethel Clayton in "More Deadly than the Male" at the Rex next Monday and Tuesday.

Some miscreant broke the lock on the gasoline pump at the Clarendon Garage one night recently and helped himself to gas. Arrangements have been made to prevent a recurrence of the episode.

Have you made your plans for the Clarendon Fair? Excel your neighbors in something. Make a record for the Clarendon district. Splendid prizes are offered for the best of everything that the district can produce.

There will be no admission charged for the Farm Problem Lecture and picture show in Rex theater, Monday evening, May 30th, at 8 o'clock sharp, but Mr. Edmund will take up a collection to help defray the expenses of his films, which he had ordered, and could not cancel.

The Rex theater has contracted for June 13-14 the great photoplay production entitled "The Shepherd of the Hills." Story by one of the most famous writers of today, Harold Bell Wright. Watch what the Calgary papers say about "The Shepherd of the Hills," which is playing the Grand Theater a week previous to that of showing here.

All McAlister and Chas. Foss made last time from Vancouver to Clarendon by auto last week coming through by way of Everett, Spokane and Kingstree. The trip of 1153 miles was made in 40 hours of running time, in a McLaughlin Special, making on an average 27 miles to the gallon of gasoline. They report the roads in very good condition and the scenery superb.

The past week has given us weather of nearly all varieties. The week end was showery. Monday, Tuesday and Wednesday were unseasonably warm. Thursday a cold wind from the north brought dust, showers and snow, followed Thursday night by a light frost and on Friday night by a hard froze which did much damage to early gardens but probably not much permanent damage to grain.

"Pollyanna" is a story of unusual sweetness and charm. Mary Pickford in the title role will teach you to play "the glad game." She will teach you how to bring sunshine into your life and the lives of others. The picture is one that everybody should see, because of its pictization of a beautiful character and the lessons taught by the child's philosophy of "gladness." At Rex theater Friday and Saturday next.

The Clarendon Players
Clarendon Chautauque, June 21 to 27.

CLARESHOLM SPRING RACES

A good crowd of about 900 people turned out to see these races held on May 24th in connection with the spring sports here. The weather was the best on record for a 24th and the racing was keenly contested. The harness race was rather spoiled by Peter breaking badly each heat.

Green trot or pace, half mile heats, 2 in 3-W. Thompson, Gramin, Jack Delaney, 1st in both heats; Dr. McMillan, Clarendon, Roy Boy, 3rd and 2nd; Dr. McMillan, Clarendon, Peter, 2nd and 3rd. Time, 1:21, 1:22 1/2. Maiden pony race, half mile—J. R. Watt, Lady Kibblesdale 1st; C. F. Leeds, Juliet, 2nd; C. Sharples, Casey, 3rd. Time, 56 3/4 seconds. Won by two lengths.

Maiden purse for horses not registered, half mile—J. R. Pierce, George, 1st; W. Marsh, Goldy, 2nd. Won easily. Time 1 min. Victoria Day purse, five-eighths mile—C. F. Leeds, Excelsior, 1st; J. R. Watt, Balsaroch Fox, 2nd. A capital race won by half a length. Time 1:30. Open pony race, half mile—J. R. Watt, Lady Kibblesdale, 1st; E. Strangways' Laddie 2nd. Also ran: Mickey, Pansy, Goldy. Won by a length. Time 50 seconds. Ladies race, half mile—Miss Bertha Strangways, Laddie, 1st; Miss Marjorie Leeds, Kamona, 2nd.

Cowboy dash—Won by Burton but disqualified for crossing and race given to Heyland, Burton taking second money.

A slow race was won by E. Strangways' horse. Half bred trial, half mile—C. F. Leeds, Excelsior, 1st; J. R. Pierce, George, 2nd. Time 8 seconds.

It Does Not Seem Enough

At the last meeting of the council the matter of tax rate for the current year was taken up, and disposed of in their usual energetic manner.

58 mills is the rate asked from the ratepayers of the town. This is an advance of 10 mills over last year, and we cannot place the blame on the school as the additional money asked by the board amounts to one mill.

Last year we thought 70 mills was high, but the council reduced the outstanding indebtedness about seven thousand dollars.

The present council was elected on a policy of lower rates and a careful expenditure of all monies. They may be doing all they promised, but the ratepayer must pay the piper.

Another year like the present one and Clarendon will be forced to add its name to the list of towns already in the hands of the receiver.

I would suggest that the ratepayers take this up and let those in authority see that we will not be governed by autocrats.

Ratepayer.

Red Cross Campaign

A public meeting in connection with this campaign has been arranged and will take place in the I. O. O. F. hall on Wednesday evening, June 1st, at 8:30 p.m. The meeting will be addressed by John W. Huggill of Calgary. Mayor Huggill has a reputation of being one of the best speakers in Calgary, and it is hoped that there will be a good attendance to hear him.

Remember the illustrated Farm Problem Lecture and regular picture show in Rex theater, Monday evening, May 30th, at 8 o'clock sharp.

Claresholm Department Store

Our stock of White Canvas Shoes for men, women and children, in all styles, has arrived; leather and rubber soles; prices right.

A special line of men's two-piece Suits in brown, blue and green @ \$20.00, young men's models.

Holeproof Hosiery for men and women, in the popular colors.

We also carry Tread Right Shoes for boys. The best boys' shoe made in Canada for the money. And the famous Hurlburt Shoe for children, including the Pussy Foot.

Groceries Cash Only

G. H. CARNEY, Secretary

The Shortage of Homes

While not prepared to fully accept the statement recently credited to Canada's only woman cabinet minister that this Dominion stands in need of one million new houses, which would meet the present time something more than one-half our estimated population of nine millions of people lack reasonable housing accommodation—most Canadians will readily agree that the provision of additional housing is one of the pressing needs of this country. Canada, however, is not peculiar in this respect; it is a condition which prevails in practically all countries, and constitutes a problem that is engaging the attention of people in Great Britain, the United States and other countries.

Dealing with the housing problem in Great Britain a short time ago, Lloyd George uttered one of those epigrams for which he is noted, and compressed in a few words a truth which is to all statesmen, in fact all citizens, should recognize. He said: "You cannot maintain an A-1 empire with a C-3 population. You cannot bring up healthy people in unhealthy homes."

A lack of adequate and proper housing accommodation means the resorting to makeshifts, to overcrowding of people and whole families in buildings where the necessary conditions of sanitation required to maintain health cannot be observed; it means the use for purposes of habitation of buildings which should not be devoted to such purposes; it means a loss of that privacy in family life, the loss of which so frequently leads to a hasty marriage; it means, in fact, the physical and moral deterioration of the people and a consequent weakening of the nation. The effect on babies and young children, who are the hope and citizenship of the future, is positively dangerous and alarming.

Socially and economically the result of inadequate and bad housing is just as serious as it is in a physical way. When people are compelled to live cluttered together in a state of congestion, or in habitations which are not fit for human habitation, general dissatisfaction arises, the prevailing order of things is engendered, and, as inevitably Governments and the present system of industrial life and society are blamed, rabid socialism and even revolutionary ideas and doctrines are accepted and spread, discontent grows, and the very life of the State is threatened, while the physical standard is being lowered.

Revolutionary ideas and extreme socialist doctrines find much acceptance among people who are the owners of the dwellings in which they live. Overcrowding a bit of land, and a house which becomes a permanent home, is the best possible guarantee of contentment within and stability for a nation. In Canada it is frankly recognized that the large percentage of the population engaged in agriculture and living on land of their own, and not as tenants, is the one outstanding factor why this Dominion has escaped to a greater extent than perhaps any other country the perils which have threatened the world following the upheaval of the Great War.

If not a million new houses, at least tens of thousands are required in Canada this year. Yet the prospect of obtaining them is remote unless some action is taken to meet the need. It cannot be met under existing conditions if left solely to individual initiative, enterprise and available financial resources of individuals. Governments and municipalities have made some provision, but it is inadequate and haphazard in contrast with the importance and seriousness of the problem. Something further is required, and it would seem that "something" should be provided, not in the way of paternal Government assistance, but in the direction of encouragement of building operations all over the Dominion.

How is this to be done? In the humble opinion of the writer of this article by Governmental action bringing about a lowering in the present costs of construction. Governments in Canada, Federal and Provincial, own and control millions of acres of forest and timber lands. They have it in their power to reduce the cost of lumber to the people of Canada by developing these resources on a large scale and in a scientific manner, by so doing they can provide employment for thousands of laborers and artisans, develop the natural resources of the country, and add immeasurably to the wealth and prosperity of the nation.

The cost of transporting needed commodities from one part of the Dominion to another has risen enormously in recent years because of increased freight rates. Admitting that increased rates were necessary to enable the railways to pay their way, it would nevertheless appear to be the part of statesmanship to reduce those rates on lumber and other building materials in order to build up the country.

Cheaper lumber in the first instance, and a lower cost for transporting it to those who want it and will gladly use it if they can obtain it at a reasonable price within their means, would operate as an immediate and tremendous factor in bringing about renewed building activity. This would cause an enormous volume of employment, and artisans with steady work and wages would be able to build homes for themselves. It would mean greater prosperity, less unrest, better health. Under present conditions even those who can possibly afford to build defer doing so to the cause of a belief that conditions about them will continue to worsen, and they then be faced with a heavy depreciation in the value of properties constructed at present high prices. They, therefore, continue to occupy houses, paying indeed high rents for the time being, which houses would be made available at a more moderate figure for those who are not in a position to build for themselves.

Explorer Is Honored

Stefansson Gets Medal For Services Rendered to Canada.

Vilhjalmur Stefansson, the Canadian explorer, has been awarded the Founders' medals of the Royal Geographical Society, London. Mr. Stefansson is at present on a lecture tour in the United States, and he received a despatch at El Paso, Texas, from the secretary of the society, Arthur Park Hickey, advising that His Majesty the King has approved of the award for his distinguished services to Canada in the exploration of the Arctic Sea. The Founders' medal fund was established by King William IV in 1841 to encourage geographical science and discovery.

Western Produce Exchange

A produce exchange has been formed at Winnipeg to handle butter, cheese, cream and poultry. Operations are to be begun at once. Quotations on these commodities will be collected from similar exchanges in the large cities of Canada and the United States.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover?

Coal Industry in Saskatchewan

The coal industry in Saskatchewan gave employment for the year ending March 31, 1921, to 3,400 men. There were forty-five mines in this district under operation, and the total output of coal was 334,389 tons.

Leg that Wouldn't Heal

"Ever since a boy of fourteen," writes Mr. John Redmond, of West Vancouver, B.C., "I had trouble with my leg. I used many remedies. Though some appeared to lead the ulcer for a while, they always broke out again as bad as ever. This last time I suffered terribly for a week, and my leg was so swollen that I could hardly walk. I had been advised to get Zam-Buk, and I bought a box. I began to use it at once, and in a few days I began to feel great improvement. It continued the treatment, for even after I had been advised to get Zam-Buk, I needed time to have complete relief. However, I am glad to tell you that the leg was eventually thoroughly healed. Never again of the ulcer size."

Only Needed Zam-Buk
25c. box, all druggists.

Another Ancient Civilization.
Ruins recently discovered in the vicinity of El Perote, State of Vera Cruz, reveal the existence of an ancient civilization. The ruins show that the people who lived there were not so different from the people of today. The ruins were made of stone or clay, but of a curious bright substance heavy and looking like tin.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more likely to result in permanent injury, or more likely to pave the way to other diseases, than indigestion. Of all the minor ills of childhood have their root in indigestion. There is no medicine for the little ones that equal Baby's Own Tablets in relieving this trouble. They have proved of benefit to thousands of mothers. Concerning them Mrs. J. M. Luntine, of Montreal, Quebec, writes: "My baby was a great sufferer from indigestion, but after I had used your tablets he is now well and contented without them." Baby's Own Tablets are sold by mail order from The Dr. Williams' Medicine Co., Brockville, Ont.

Yes, the woman and a woman's heart are constantly changing—but there's always a man in them.

Drives Asthma Before It. The smoke vapor from Dr. J. D. Kelley's Asthma Remedy gives asthma no chance to linger. Our experience with the relief-giving remedy shows how and why it is so good. It is the result of long study and experiment, and it is so good that it is known to the public until its makers knew it would do its work well.

Too many men in the country vote as they pray—and they never pray unless it is to ask a personal favor.

Minard's Liniment Lumberman's Friend.

A Federal Research Bureau

Bill Providing For This Will Be Introduced by Sir George H. Foster

Provision for steps to be taken to develop the equipment of a federal research institute on somewhat the same basis as the bureau of standards at Washington, will be made in a bill to be introduced in the house by George Foster, minister of trade and commerce.

The creation of a research bureau at or near Ottawa has been urged upon the government during the last two sessions by the honary and advisory council for industrial and scientific research. It has been urged by the council and by the members of the special parliamentary committee on scientific research that the establishment of a research bureau here was absolutely necessary if Canada was to take her proper place in industrial and scientific development.

The proposals which were laid before the government called for an expenditure of about a half a million dollars for buildings and equipments, but it is understood that this estimate has been somewhat modified and that the initial outlay would not be more than \$200,000 for the first year.

For Irrigation Project

The Calgary office of the Canada Land and Irrigation Company has received word from the office in London, England, that satisfactory arrangements have been made for financing the construction program of the irrigation project in Southern Alberta, involving an expenditure of \$1,500,000.

The women of Egypt have cost paid their section and are demanding freedom from imprisonment in the harem.

DRINKS FOR THE CHILD

BY LORETTA C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

A mother writes that it is all very well for dietitians to tell mothers that their children must never have a drop of tea or coffee, but that children get tired of sweets.

For a change, give them Cambric tea. Half a cup of milk is mixed with half a cup of boiling water. A little sugar is added and the youngster sips his tea along with the grown folks who are perhaps indulging in Orange Pekoe.

The cereal coffee on the market—and there are several varieties—are good for children and most acceptable to the palate if properly made.

Sometimes a child will take hot milk which it has flavoured with cereal coffee. If it refuses it, if unfavoured, malted milk may be mixed with either hot water or scalded milk. It is good cold as well as hot. Cold malted milk is often accepted by a child if a generous spoonful of flavoured ice cream is mixed into it.

Hot lemonade for the hot meal at evening may be very properly given. It is so much better than tea or coffee. Squeeze half a lemon into a strainer set over a saucer. Add one level tablespoon of sugar and one-half a measuring cup of water. Boil for one minute. Pour into a mug. Add a little cold water to cool for drinking.

Grate juice, either hot or cold, is suitable for children. Add one grape juice added to a lemonade gives it a different turn.

Of course, children should learn to drink several glasses of water a day. But the water hot if you must, but give child water.

If you live where fresh pineapples are fairly cheap, you can enjoy a pineapple salad. Add one level tablespoon of sugar and one-half a measuring cup of water. Boil for one minute. Pour into a mug. Add a little cold water to cool for drinking.

Forage Crop Competitions. Carried out on the recommendations of the Better Farming Commission, a series of co-operative experiments will be undertaken in Saskatchewan in the growing of crops for forage. These experiments will take the form of competitions.

ADVICE FOR BACKACHE

When stooping hurts, when lifting and carrying causes distress, when time to rub in lots of "Nervine." Usually a couple of applications of this wonderful salve will give you some soothing, more certain to kill muscular rheumatism or sprain. Thousands of homes rely on good Old Nervine for cramp, colic, dizziness and external muscular pain. It costs 35 cent bottles for sale everywhere.

World's Highest Mountains

Andes Have Greatest Number of High Peaks.

The Himalayas contain the tallest mountain in the world, but it is the Andes of South America that are to be found the greatest number of peaks over 20,000 feet in height. In Bolivia are the Cordillera de la Paz of which twelve peaks, higher, tower more than four miles towards the sky.

Further north in Ecuador are twenty volcanoes in one cluster, all covered with perpetual snow. The lowest is just on 16,000 feet, the highest, Mount Chimborazo, is 20,498 feet. Three of these volcanoes are still active, and eleven out of the twenty have never yet been climbed. The highest of the South American Andes is supposed to be Aconcagua, 23,080 feet. But the Andes, between the isthmus of Panama and Cape Horn, can show no fewer than 284 peaks, which are more than 10,000 feet in height, 138 over 16,000, seventy-nine over 19,000, and forty-two over 20,000 feet. The four biggest all exceed 20,000 feet. The Andes possess another record, in the shape of the highest road in the world. This is the famous Ayacucho road, in Peru, which pierces the mountains by the Cuernavaca Tunnel at a height of 15,654 feet. This is almost the same level as the topmost summit of Europe's highest mountain, Mont Blanc.

Russia is the only great gold producing country in Europe.

A Gruesome Paradise

Russia Dying Before the Eyes of a Helpless World.

After a little over three years of Soviet rule Russia lies dying before the eyes of a helpless world. What was to have been the triumph of Marxism Socialism has become a disaster, which has involved in mental and physical suffering many millions of human beings, besides sweeping away all the foundations upon which their prosperity rested. When Lenin, Trotsky and Chicherin seized the reins of power towards the close of 1917 they proclaimed a Communist Government with a Constitutional Assembly—which has never assembled from that day to this—in which the last word as well as the first word would lie with "the workers." At last the great masses of Russia, whether living in the towns or engaged in various agricultural pursuits in the countryside, were to come into their own. What has been the sequel—London Daily Telegraph.

A Divorce Granted
After many years of patient suffering, you can be divorced from your matrimonial miseries by applying Farnham's Corn Extract. This wonderful old remedy cures 24 hours and never fails. Refuse a substitute and remember "Patience gets the Fairness reward." 25c everywhere.

In English law there is no definition of an accident.

Minard's Liniment Co., Limited.
We have used your MINOR'S LINT for 100 years, and it is the only one that I have ever used any equal to it. It has been the hands and feet of the household for 24 hours. It is also the best for burns, sprains, etc.

Yours truly,
J. G. LESLIE.

Minard's Liniment Co., Limited.

Hawaii Using Volcanoes
Scientists Claim Volcanic Gases Have Limitless Possibilities.

The volcanoes of Hawaii, whether dead or alive, are working for, or are going to be made to work for the people. Honolulu has just tapped the latent gases of Pualoa overlooking the city, and is getting therefrom 2,000,000 gallons of drinking water daily. Hilo, on the island of Hawaii, is raising a fund to tap the active volcano Kilauea and utilize the tremendous volume of gases there for industrial and other purposes. Scientists say that pentup volcanic gases have limitless possibilities for an industrial and power standpoint, while they also contain all the food elements necessary to sustain the human body—carbon, nitrogen, hydrogen and lime.

Farm Products of B.C.

The British Columbia minister of agriculture, Hon. E. B. Barrow, announces that the value of the farm products of the Pacific province last year exceeded sixty-eight million dollars. The minister adds that, not less than 15 per cent. of the area capable of cultivation is occupied.

TROUBLED WITH ITCHY ECZEMA

In Rash On Face And Limbs. Cuticura Heals.

"I had been troubled with eczema on my face which took the form of a rash. Later it broke out on my limbs and they itched very much, causing me to scratch them until they were bleeding. The rash would keep me awake at night."

"I tried some remedies, which failed, and then thought I would try Cuticura Soap and Ointment. It was not long till the rash began to disappear, and I had soon got rid of it. I had four boxes of Cuticura Soap and Ointment, which I used twice a day. I am now well and happy." (Signed W. M. Hyman, Paris, Ont., Sept. 12, 1919.)

Cuticura Soap to cleanse. Cuticura Ointment to soothe and heal. Soap 25c, Ointment 25c and 50c. Sold everywhere. The J. C. F. Co., Montreal, Quebec, Canada. Write for literature.

Bauly Horses

What to Do and What Not to Do to Prevent and Overcome Trouble.

It is doubtful if any horse is a born banker, that very generally being acquired through mismanagement when young. It is no exaggeration to say that numbers even temper horses have been absolutely spoiled by overloading and over-driving before the muscles of the shoulders are seasoned to the pressure of the collar. Young animals should never be expected to pull a load which is too heavy for them. The task should be gradually increased as the horse becomes accustomed to work, and gains confidence as his shoulders broaden. In all cases a horse must be watched, and see that his horse, especially if young, is not getting winded or showing signs of over-exhaustion by breaking out suddenly into a heavy sweat. Before he stops of his own accord, pull him up with a sharp "whoa," lift the collar, and let his shoulders cool for a minute or two; do something to the harness while he gets his wind. By doing this the animal gets fresh again, and is not cowed. If the shoulders are over-heated and tender, and he is out of wind, violent means to make him go faster will only make him more obstinate, and that a banker is made.

USE SLOAN'S TO WARD OFF PAIN

You can just tell by its healthy, stimulating odor, that it is "going to do you good."

"I F I only had some Sloan's Liniment. How often you've said that! And then when the rheumatic twinges—after hours of suffering—come on, you don't get a bottle of Sloan's Liniment. You'll soon see the worth and value of Sloan's Liniment. It's the liniment that penetrates without pain. Clean, economical. Three sizes—35c, 70c, \$1.40 (Made in Canada)"

The four biggest all exceed 20,000 feet. The Andes possess another record, in the shape of the highest road in the world. This is the famous Ayacucho road, in Peru, which pierces the mountains by the Cuernavaca Tunnel at a height of 15,654 feet. This is almost the same level as the topmost summit of Europe's highest mountain, Mont Blanc.

Russia is the only great gold producing country in Europe.

World's Highest Mountains

Andes Have Greatest Number of High Peaks.

The Himalayas contain the tallest mountain in the world, but it is the Andes of South America that are to be found the greatest number of peaks over 20,000 feet in height. In Bolivia are the Cordillera de la Paz of which twelve peaks, higher, tower more than four miles towards the sky.

Further north in Ecuador are twenty volcanoes in one cluster, all covered with perpetual snow. The lowest is just on 16,000 feet, the highest, Mount Chimborazo, is 20,498 feet. Three of these volcanoes are still active, and eleven out of the twenty have never yet been climbed. The highest of the South American Andes is supposed to be Aconcagua, 23,080 feet. But the Andes, between the isthmus of Panama and Cape Horn, can show no fewer than 284 peaks, which are more than 10,000 feet in height, 138 over 16,000, seventy-nine over 19,000, and forty-two over 20,000 feet. The four biggest all exceed 20,000 feet. The Andes possess another record, in the shape of the highest road in the world. This is the famous Ayacucho road, in Peru, which pierces the mountains by the Cuernavaca Tunnel at a height of 15,654 feet. TO ASSIST THE FARMERS BY PLACING SETTLERS ON UNOCCUPIED LANDS

Managing Director of the Western Canadian Association Discovers the Plans of the Organization—Major-General A. D. McRae, C.B., Immigration Director, Settles the Problem of Settling Settlers on Vacant Lands With Prices Good For a Reasonable Period.

Mr. M. T. C. Greer has said, population is the only power that can solve the National Farmers problem. The simple fact is that settlers in Western Canada nor Canada as a whole cannot "carry" over a marked increase in the number of people on the land. The present sparse population of the three prairie provinces indicates an unnecessary burden upon the settlers themselves, as it does upon the entire country. The larger the number of actual farmers on the soil, the more potent will their voice be in regard to such questions as freight, elevating, marketing and purchasing.

A number of far-seeing men have brought the Western Canadian Association into being. The organization has been created to assist the farmer in his struggle. Under its federal charter it can make no profits. It is financed by voluntary subscriptions from the part of citizens who have the progress and welfare of the country at heart.

The Board of Directors is made up of representative farmers and leading business men. Its purpose is to bring about the settlement of the unoccupied lands lying close to the prairie provinces and to hold out cultivation in the hands of the settler.

Major-General A. D. McRae, C.B., who was recently appointed managing director of the organization, is an experienced colonization expert, and has been drawn up by him the heartiest co-operation of the prairie provinces governments is essential to the success of the organization.

He asks that each of the three administrative boards to place the association with a fixed list of unoccupied lands as prime good for a reasonable period. In his opinion little progress can be made with the difficult task of settling the west unless this request is complied with. He refuses to believe that any one of the provinces will forego its share of the prospective benefits to be derived from the land raised by the Western Canadian Association.

During the last few days a delegation, including Major-General McRae, Mr. M. A. Brown, of the Department of the Interior, and other Directors of the Association, have been in the Manitoba, Saskatchewan and Alberta cabinets with a memorial setting forth the suggestions of the organization. In each case the delegation was received by the cabinet and its colleagues. The memorial presented read as follows:

To the Honourable Mr. Premier and Ministers of the Council.

I thank you on behalf of the Directors of the Western Canadian Colonization Association for this opportunity of meeting with you to discuss the problem of colonizing lands in your province.

Before proceeding, I would like to state the mission of our organization. Our organization is supported entirely by voluntary subscriptions from prominent Canadian business men and corporations. Business interests in Eastern and Western Canada have subscribed a very large sum of money to an association whose only aim is to assist in settling the unoccupied lands of Western Canada. This fact reveals a national realization of the need for increased immigration to the land.

Our undertaking in its very nature discloses its close connection with the people of the prairie provinces and their desire to see the whole object, as well as hereafter shown, is to better the economic position together with that of the whole Dominion.

To Settle Unoccupied Lands.

We seek no cash assistance from your government or any other government. Our association is a corporation without the power of gain. It cannot, under its charter, become interested in the sale of land on commission or for any other pecuniary consideration. We are able to sell ground except the public sale. Our sole purpose is to assist in the development of the western provinces and particularly in the placing of settlers on the unoccupied lands adjacent to the present railways. It is our desire to co-operate closely with the immigration agencies in order to avoid duplication of effort and consequent waste of money.

We are here today to discuss the problem of settling the unoccupied lands and by filing in the gaps in colonization work which the government cannot bridge, we hope to be an active force in a great forward movement.

We are here today to discuss the problem of settling the unoccupied lands and by filing in the gaps in colonization work which the government cannot bridge, we hope to be an active force in a great forward movement.

life of the community. It is only by such means that the exodus of farmers from various districts can be stopped and the agricultural population be given that permanence of tenure which is essential to the continued growth and welfare of the country.

Internal Migration.

Furthermore, it would appear that the Land Settlement Board, with the information it will possess, can help you an organization especially qualified to handle the transfer of settlers within the province.

In addition to dealing with the land question, the board can help in the effective Provincial Settlement Board have a very powerful indirect influence on the settlement of the province throughout the province generally and will be a safeguard for any private agency to undertake colonization in a big way.

A Fixed Price List Necessary.

The great need is a plan under which the unoccupied lands can be brought into the market in a systematic manner—a plan including the issue of maps and price lists holding good long enough for negotiations with settlers to come in, look over the land and close the deals before the price is jumped on them. We feel that the plan should be a permanent one to accomplish this in a large way is possible.

In our judgment neither of them can complete for sale lists of unoccupied lands aggregating an acreage of 100,000 to 200,000 acres with a permanency that will be found effective. If we are going to make the land available to the settler, we must have a permanent plan that will be found effective.

If we are going to make the land available to the settler, we must have a permanent plan that will be found effective. If we are going to make the land available to the settler, we must have a permanent plan that will be found effective.

If we are going to make the land available to the settler, we must have a permanent plan that will be found effective. If we are going to make the land available to the settler, we must have a permanent plan that will be found effective.

If we are going to make the land available to the settler, we must have a permanent plan that will be found effective. If we are going to make the land available to the settler, we must have a permanent plan that will be found effective.

If we are going to make the land available to the settler, we must have a permanent plan that will be found effective. If we are going to make the land available to the settler, we must have a permanent plan that will be found effective.

Motive Power Expert

R. A. Pyle, Superintendent of Motive Power and Chief Engineer of the Canadian Pacific Railway Western Lines.

small colonizer finds the effort required too great, the expense too heavy and the returns too uncertain. The area of the prairie provinces is so tremendous, the railways and their branch lines are so numerous that the practicalities of incoming settlers are so located within reasonable distances of existing transportation facilities.

Any successful colonization plan must deal with the individual settler. Given the opportunity to co-operate with the Western Canadian Colonization Settlement Board, given the line of country extending to the resident owner or the responsible local land agent, supplied with literature, maps and permanent price lists of unoccupied lands, I firmly believe the colonization of the prairie provinces can bring into the province a great number of the right kind of farmer settlers.

Respectfully submitted,
(Signed) R. A. Pyle, Managing Director.

No Danger From Comets

Even if One Struck the Earth It Would Not Harm Us.

From time to time the columns of the newspapers are enlivened with news of the discovery of new comets and the possibility of collision with the earth. Alarming rumors of this sort, it will be recalled, attended the last visit of Halley's comet and now it is the Pons-Winnecke comet that is about to annihilate us.

Sensational announcements on this subject having been erroneously effected in the press to Greenwich Observatory, Dr. A. D. C. Crommelin of the observatory, takes occasion to deny them in the Journal of the British Astronomical Association.

As to the chances of collision between the comet and the earth, he says that the uncertainty of the comet's distance from the sun at actual passage is quite sufficient to make it impossible to say whether or not it will strike the earth, or, in any case, that it will pass within a distance of 100,000 miles of the earth.

Now, as the possible range of perihelion passage is some four hundred times the combined length of the earth, the chances of collision are 1 in 400,000, or say one in 70,000. If we assume for the comet a diameter three times that of the earth, we should multiply the chance by 16, but it would still be only one in 4,000.

Collision with the comet, says Dr. Crommelin, would probably annihilate the earth, while even if the head were encountered there is no reason to anticipate anything more than a great noise, however.

Clove Trees

Grow Very Tall and Satisfactory Air

Ninety per cent of the world's supply of cloves comes from two tiny islands off the coast of Africa—Zanzibar and Pemba.

The clove tree is a small tree, the clove takes many years to grow to the height of the tree, and the tree is very hardy and grows in all climates.

Western Canada Is Attracting Great Numbers Of Settlers From U. S.

Nearly fifty thousand immigrants came from the United States to Canada in the year 1920 to make permanent homes in the Dominion. Practically all of these, it is estimated, were experienced agriculturists who either secured free government homesteads or purchased improved farms.

Whilst this very desirable contribution to Canada's man power, deposited in the manner to best serve Canada's need, is only about one-third of that of the years prior to the war, it is estimated authoritatively that the Dominion received last year, and during the war years, as many farmers from the United States as she has ever welcomed, and that the class whose emigration fell off due to war conditions were the industrial, the speculative and others not directly producers. It must also be borne in mind that would-be emigrants at the border are sifted as carefully as at ocean ports, and that in the existing international conditions, in some months, as many applicants at border towns were rejected for Canadian citizenship as were accepted.

Farmers as was 1920's emigration of grain from the United States, greater attention was drawn in that year to the augury of the 1922 census, in the more general interest taken in Canadian lands and agricultural affairs, the harvest of which will be reaped this year.

Whist large numbers of farmers came to settle with their families on western farm lands, there was an infinitely greater number of scouts who, for themselves or others, came to look over the situation, judge as to locally, plot out the land, and purchase, and then return to their homes to clear up their affairs before making the final move and settling in the newly chosen homes.

During the summer, under the auspices of the Dominion Government, several trains carrying American tourists and business men toured the Canadian West, the trips being by a more a revelation. They were escorted by the Canadian Mounted Police, and they brought back with them many boosters for the country. Many could not withstand investing in the assured future of the country.

Representative of thickly settled agricultural districts and in close contact with the economic conditions pertaining to them, was that one hundred thousand Americans would settle in Western Canada during the year 1920. A great wave of immigration, they felt, was inevitable, and this first tide of the early spring would come to justify.

As the first tide of the early spring would come to justify, they felt, was inevitable, and this first tide of the early spring would come to justify.

As the first tide of the early spring would come to justify, they felt, was inevitable, and this first tide of the early spring would come to justify.

for years, it can be contained in the tremendous interest exhibited by United States farmers and others throughout the whole last year.

Electric Method To Increase Grain Yield

Southern Alberta Farmers Adopt New Method of Treating Seed Grain.

Seed treated by a new process of seed electrification, a method which, it is claimed, will increase the yield, check the spread of fungoid diseases and improve the quality, will be sown this year by many of the leading farmers in Southern Alberta. A plan for the treating of seed has been established and already its capacity is taxed to such an extent that enlargement will be made immediately.

Great claims are made as to the advantages of this system which is known as the Wilcox Electro-Chemical process of seed electrification. The process consists in placing the seed to be treated in a bath containing a solution of metallic salts such as calcium or sodium chloride and weakly electrifying the same for a length of time appropriate to the seed under treatment. The solution is then run off, and the seed taken out and dried. The object of the process is to increase the resistance of the seed to disease, to increase the conductivity of the seed coat, but to maintain that conductive effect between fertilization and germination. Calcium and sodium in correct proportions are, however, plant foods and assist in the after stimulation of the seed.

This method is a new one to Canada, but it has been tried with remarkable success in England.

Advocate Widening Saskatchewan River

At An Estimated Cost of Twenty Millions River Could Be Made Navigable.

Hon. J. L. Cole, Provincial Secretary and minister of mines for Alberta, read a statement in the Ottawa House regarding the coal situation in this province. The key to the marketing situation, he said, was the widening of the Saskatchewan River.

He said that the river was now only navigable for small boats, and that a survey of this project and it was estimated by spending \$20,000,000 a channel six feet by 150 feet could be made.

Winning. The reduction in freight would be from the present six miles per ton to one and a half miles.

Checking the water in the mountains would be contingent to the scheme and power could be generated, thus increasing the cost.

War Responsible For Eye Surgery

Study Began After Advance of French Into Egypt.

Little was known concerning the surgery of the eye in Great Britain until the expedition into Egypt under Sir Ralph Abercrombie took place following the advance of the French into the land of the pyramids led by Napoleon Bonaparte. The British troops, says the New York "Medical Journal," became the victims of conjunctivitis ophthalmia, which was then widely prevalent in that country, and brought back by the troops to England.

STRIP THE SUMMERFALLOW WITH CORN OR SUNFLOWERS

J. O. McCook, B. S. A., School of Agriculture, Clareholm, Alta.
Purportedly every farmer in southern Alberta is asking the question, "How am I to prevent my summer fallow from blowing?" Now I submit this solution, believing that if it is well carried out it will do a very good deal toward solving the soil drifting problem of southern Alberta, besides having several other very important advantages for the agriculture of the country:

1. Providing fodder.
2. Utilizing a part of our expensive summerfallow and at the same time not curtailing the area of our great cash crop, wheat.
3. Introducing mixed farming, without which we can never hope to succeed.

The Method

Say you have a quarter section to follow this season. Spring plow it deep and pack immediately, strips north and south two to three rods apart according to your local conditions. These strips can be one, two or three widths of the ordinary grain drill, just as you wish.

In the warmer, southeast areas where corn has given fairly good satisfaction in the gardens, etc., seed in Northwestern Dent corn, up to the 7th of June, 25 pounds to the acre in rows 26 inches apart with the ordinary grain drill, stopping up the intervening holes with cardboard discs. Cultivate during the summer, several times with the corn cultivator or the disked cultivator with the necessary tooth removed, will give good satisfaction; but keep the crop close along you will not secure a good wheat crop the following year.

In the colder foothill areas and north of Nanton, it would be better to seed sunflowers because they stand lower, temperature and grow later in the season. Sunflowers should be seeded in exactly the same way as described for corn, seeding five to seven pounds to the acre. But if you are to utilize sunflowers you must have a silo, but a pit silo will give good results if you do not feel like building a state or cement block silo. On the other hand, corn can be shocked and makes excellent fodder and many a wheat farmer could, with this system, winter a bunch of stockers where before they did not have a hoof on the place.

Another great advantage of striping with corn is that you will likely get more wheat off the corn ground than you will off the summerfallow, and these strips will afford protection from the wind, checking the force, preventing the drifting and evaporation. The corn or sunflower stubble will collect snow and prevent drifting during the winter and following spring. If the soil is apt to blow, it may pay to have some of the strips standing throughout the winter; this feature may be tried at your own discretion.

The strip system need not be confined to corn and sunflowers; you can seed barley and oats, millet or Sudan grass in the row system and get surprisingly good yields. Simply stop up the holes so that you have a thin tile or triple row every 35 inches and cultivate as you would corn.

The following results of experiments at the South Dakota experimental station show the comparative yields between the ordinary seeding of small grain and the row system: ordinary seeding, 24.4 bus. to acre, double, 12 inches apart, 22.5 bus. to the acre. Double rows, 36 inches apart, 19.6 bus. to the acre. Triple rows, 30 inches apart, 23.1 bus. to the acre.

I have every confidence that the soil drifting of southern Alberta can be greatly reduced and a more permanent and profitable agriculture introduced if such a system is followed. The trouble is that we will not get out of the rut but stick tenaciously to the old straight wheat game, which the history of other countries has proved to be unwise.

What we need is Action!

Gasoline and Storage Cheaper

Gasoline is getting cheaper. We are now selling at 50c per gallon Cash.

Storage is also cheaper -- \$5.00 per month during the summer months. Store your cars with us and take advantage of our excellent service.

We wish to call your attention to the fact that we have only **one** price.

Our repair business is steadily increasing and in order to give the best service possible we are taking on another mechanic. He comes from Cranbrook and is very highly recommended.

When your car "balks" come around and see us.

Better Farm Buildings Pay

Your farm implements are expensive. Are you allowing them to become rusty and disintegrated because of a leaky roof? Your livestock is worth a lot of money to you. Are they properly housed? Is your hay and grain perfectly dry all the year round?

Altogether it is a mighty good plan to have your buildings in good condition. It generally means a saving. And with prices as high as they are you can't very well afford to abuse your implements or waste a lot of grain.

We carry everything in lumber and our prices are always fairly priced. Why not ask us to give you an estimate on the work you'll have to do. Stop in next time you are in town or phone and tell us what you want.

BEECHAM'S PILLS

AMONG THE DAISIES

By E. L.

Written Exclusively For This Paper

"And so, Nellie, you have made up your mind to go to the big city?"

Nellie swung her wide bonnet hat to and fro ere she replied:

"Yes, Ned. I want to be independent, to earn money for myself, and now that Aunt Maria has this friend of hers coming, it's a good chance for me to get away."

Ned, big and burly, with his chin open at his pillar-like throat, a very son of the soil, could not forbear a slight smile as he looked down at the five feet of independence before him, who was about to go out and make her mark in the world.

Nellie was an orphan who had been brought up by her aunt, but for some time now her soul had chafed against the restraint of her quiet country existence. She was twenty-one and she wanted to go to the city.

And so, with a gay smile on her face, standing among the daisies in the sunlit field that beautiful June afternoon, Nellie said "good-bye" to Ned who had loved her all his life. Ned was a prosperous young farmer, but he seemed very prosaic to Nellie who had all sorts of visions of being a clever business woman, and who to whom the life of a farmer's wife did not in the least appeal. And Ned, whose heart was aching, said no word.

The weeks in the city passed slowly. The little room for which Nellie thought she had to pay a small fortune was hot and stuffy and she could not help remembering the clean white cottage she had left where the rambling roses climbed, and yes, some-times as she struggled with the mysterious dots and dashes in the Piman system, the beautiful green fields white with daisies rose before her. But she was proud and said no word, and in the country they thought she was happy. They had no idea of how lonely a little country girl a twenty-one can be in a large city.

And then one day Nellie took sick and for weeks she lay at the point of death. But youth and a good constitution triumphed. Ned and Aunt Maria travelled up to the city to see the "little lass."

"Praps," ventured Aunt Maria hopefully, "she may be willing to come home for a spell, eh Ned?"

"I shouldn't wonder," replied Ned.

MURINE Night and Morning. Eye, Nose, Throat, Ear, and Skin. For all sorts of troubles. It is the only medicine that will cure all these troubles. It is the only medicine that will cure all these troubles. It is the only medicine that will cure all these troubles.

W. N. U. 1366

setting his lips in a firm line, "I shouldn't wonder."

And when Nellie saw Ned she knew that she was not cut out for a career, that she was just a little country blossom which would quickly fade if transplanted elsewhere, and that she could, after all be quite happy in a farmhouse.

"Oh," she said, as they were leaving the hospital, "where are you taking me, Ned?"

"We're taking you home, my girl," Ned's voice was gruff, but his heart was full and he could hardly suffer himself to look at this little pale face which had been so blooming that last day they had talked among the daisies.

"Yes, dearie," chirped Aunt Maria, "the city don't 'pear to have agreed with you, but if ye have a rest and pick up a bit you can come back next summer."

Next summer came and on a lovely June day Nellie and Ned again stood in the field of daisies.

Ned stooped and picked one of the white blossoms and brushed it against her soft cheek.

"Are you going to the city this year, Nellie?"

"Maybe!" replied Nellie mischievously, showing a provoking dimple as she smiled.

"And maybe not!" replied Ned masterfully, drawing her closer to him. "Maybe not," he went on. "Instead I think you and I are going to be married and live in the big farmhouse down the lane. You were never meant for the big, hungry city, but just for a sweet country day."

At Nellie's smile no reply to this he presume that Ned was right.

Nervous Headaches, Dizziness

COULD NOT SLEEP

Wherever there is any weakness of the heart or nerves, dragging energy or vitality away from the system, the result is a nervous headache, dizziness, and a general feeling of weakness. This is the case with all nervous diseases. The heart and nerves are the two most important organs of the body. If they are weak, the whole system is affected. The result is a nervous headache, dizziness, and a general feeling of weakness.

Mrs. M. Langford, Youngs Cove, Road, N.B., writes: "I was bothered very much with my heart and nerves. I had nervous headache, dizziness, and could not sleep nights and my appetite was all gone. I was almost a nervous wreck when a neighbor told me to try Millard's Heart and Nerve Pills. I took them and before long I had the second box and I was better."

Price 50c a box at all dealers or mailed direct on receipt of price by The Millard Co., Limited, Toronto, Ont.

War With Wild Beasts

Many People In India Are Killed Every Year.

The struggle between human beings and wild animals in India is a constant one. Last year fifty-five persons were killed by elephants, five by hyenas, 109 by bears, 350 by leopards, 853 by tigers, and 688 by boars and other animals. Poisonous snakes claimed no fewer than 22,478 victims. More than 19,000 wild beasts of various kinds were destroyed and 91,000 snakes were killed. Hundreds killed off many of the small animals that are ordinarily the prey of wild beasts, and this probably accounts for the attention that tigers and other large animals have given to their human neighbors.

But it is for Lame Back—A brick rubbing with Dr. Thomas' Electric Oil will relieve lame back. The oil will immediately absorb the oil and it will penetrate the tissue and bring speedy relief. Try it and be convinced. As the liniment sinks in the pain comes out and there are ample grounds for saying that it is an excellent remedy.

Increased Use Of Drugs

Drug Advertisements Reported on Increase in Vancouver District.

Indicating an increase in the use of drugs in Vancouver during the last few years, the annual report of the city health department shows that the number of examinations of drugs during 1920 was nearly double that of the year previous and more than five times as many as in 1917.

During 1920 the health department analyzed for the police department 1,148 samples of opium, morphine, heroin and cocaine. During 1919, the number was but 1,133. In 1918, 512, and in 1917, 429.

The highest is the largest of the British family.

"Your Teeth"

By Rea Proctor McGee, M.D., D.D.S., Editor of Oral Hygiene.

GOTTER.

Copyright, 1921, by Rea Proctor McGee.

In speaking of the diseases and infections of the body that arise from the teeth, it is not intended to give the impression that the teeth are invariably the cause of infection, but these cases are explained in order to show the results of neglecting mouths.

Until recent years we had not realized the danger of neglecting the mouth and teeth—because digestion was so seriously interfered with, by the inability to chew, and because appearance and distinct speech were ruined, and because pain of many kinds and of great intensity was a very frequent occurrence, and because broken down and worn teeth retained decomposing food and mucus, with a resulting bad breath. These were a few of the things that caused the more cultured people to have their mouths put in order.

The researches of the great institutions of medicine that are devoted to the study of disease have shown to the satisfaction of neglected mouths are far more serious than we had at first believed. The more cultured people, in later life, to have their mouths put in order.

The researches of the great institutions of medicine that are devoted to the study of disease have shown to the satisfaction of neglected mouths are far more serious than we had at first believed. The more cultured people, in later life, to have their mouths put in order.

Begin with the children, and if the child is brought up with its mouth in good condition and to know the comforts that follow a good mouth condition, this child will make very strenuous efforts, in later life, to have those same physical comforts.

One of the most embarrassing as well as serious of the widespread diseases of this country—a condition that is becoming more and more frequent—is goiter, which is the enlargement of the thyroid gland which lies in the interior portion of the neck.

A swelling of this gland produces a very unsightly enlargement of the neck, many times causing a series of what is known as thyroiditis.

Thyroiditis is attended with sleeplessness, nervousness, nervousness, and excitability, twitching and rapid heart action.

It was found that in large numbers of goiters the infection in the thyroid gland was a certain bacteria that is found in abscess cases at the ends of roots of diseased teeth in the mouth of the patient and in many instances the treatment of the teeth, or the extraction of the teeth and cutting of the roots, relieved the goiter entirely.

It is therefore advisable to have a careful X-ray examination of the mouth in all goiter cases.

Superstition of Sailors.

Old sailors believe Blücher will surely follow if anyone will be so densely count the number of persons on board ship.

It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which progresses ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to make it palatable and it will allay the irritation and prevent the ulceration and swelling that are so painful.

Those who were periodically subject to quinsy have thus made themselves immune to attack.

Winner For Fourth Time.

S. Larcombe, of Birtle, Manitoba, has been declared winner of the Manitoba Tree Fruit average prize in connection with the National Products Exhibition held in Winnipeg last January. This makes the fourth time Mr. Larcombe has won the average prize.

English Sociologist Is Dead in Prison.

The death in Prison of Professor Bernard Russell, English sociologist, mathematician and philosopher, who arrived in China late in 1920 for a lecture, is reported.

Mammoth Trees of California.

The mammoth tree of California, the giant of the famous Sequoia grove at Calaveras, is 327 feet high by 90 feet in circumference. It is believed to be 3,000 to 4,000 years old.

DODD'S KIDNEY PILLS

BRILLIANTLY SUCCESSFUL IN THE TREATMENT OF ALL KIDNEY DISEASES.

4087 THE PROPRIETOR

Baby Specialists.

THAT there are Physicians who specialize on Infant ailments you know. All Physicians understand Infant troubles: all Physicians treat them. It is his profession, his duty, to know human ills from the Stork to the Great Beyond.

But in serious cases he calls in the Specialist. Why? He knows as every Mother knows, or ought to know, that Baby is just a baby, needing special treatment, special remedies.

Can a Mother be less thoughtful? Can a Mother try to relieve Baby with a remedy that she would use for herself? Ask yourself; and answer honestly!

Always remember that Baby is just a baby. And remembering this you will remember that Fletcher's Castoria is made especially for Infants and Children.

Children Cry For

The False and the True.

Advertising by the use of large space, the expenditure of huge sums of money have placed on the market, have put in your home, perhaps, many articles that today have been discarded, as you will readily admit. Do you recall anything that has more modestly appealed to the public than has Fletcher's Castoria; modest in all its claims, pleading at all times—and truthfully—for our babies?

The big splash, the misleading claims may win for a time, but the honest truth-telling advertiser is like the old story of the tortoise that beat the hare.

Mothers everywhere, and their daughters, now mothers, speak frankly, glowingly, enthusiastically in praise of Fletcher's Castoria. Speak of it lovingly as a friend that has brought comfort, cheer and smiles to their little-ones.

To them, to these true mothers no argument can induce them to set aside their bottle of Castoria, their old friend, that they might try even another and unknown remedy for babies. Then, would you think of going to YOUR OWN medicine chest to find relief for Baby's troubles? Can you not separate the false from the true?

MOthers! Would you think of the BOTTLE THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.
THE CENTAIN COMPANY, NEW YORK CITY.

One Of The Unconquerable

Man Paralyzed in Childhood Has Career Worthwhile of Admiration.

John H. Brown, formerly of Indianapolis, who was paralyzed in childhood, and who in spite of his serious infirmity struggled through a career, edited a paper and was the mayor of Indianapolis before he was 21.

Now, at the age of 29, earning \$2,000 a year as a writer and head of the Michigan Hospital School at Farmington, near Detroit, established with a million dollar gift from Mayor Cullen.

There will be no steps to climb in the buildings; for Sullivan's career is worthy of admiration.—Arkansas Methodist.

Art is not a thing separate and apart—it is only the beautiful way of doing things.

Under the British army regulations no soldier is eligible for married quarters unless he is 30 years of age.

France Bids For Olympia

Paris Would Secure the Olympic Games for 1924.

Premier Briand of France states it is his earnest desire that Paris secure the Olympic Games in 1924, and promised the moral and financial support of the government to that end.

Premier Briand has offered government support to the building of the stadium necessary in case the games are held in Paris, plans for which will be submitted to the International Olympic association at its coming conference at Lucerne, Switzerland, June 2.

The number of flowers in a sweet-scented is legion, but three stand out before all others—the rose, violet and orange blossom.

The Australian water lizard, which is three or four feet in length, walks upright on its hind legs when traversing long distances on land.

Oil Development in Alberta.

The development of oilfields and Black Diamond oil districts will be undertaken by the Royal Canadian Mounted Police.

At \$1,000,000 of which, it is reported, \$800,000 of stock is held by the Imperial Oil Company, and \$200,000 by the Diagraph interests. It is said that the Imperial Oil has contracted to spend \$400,000 in developments of the province.

World Happenings Briefly Told

Ford Motor Co. has started recall of five workers without dependence to its automobile plant at Detroit.

Final figures of the referendum commission put Toronto on the west side by a majority of 9010.

A Cincinnati woman left the bulk of her estate to the U.S. Government to help pay off the war debt.

A Detroit judge permitted a prisoner to leave court to attend a funeral. He hasn't got back yet.

Wolland, Ont., fears loss of early cherries by the recent severe cold weather.

In five years Chicago has had 1,144 murders, New York 1,121 and London, England 128.

Among the items approved by the Ontario Legislature is one of \$1,000,000 for establishing a provincial cement plant.

From 40,000 to 50,000 men will be required to gather the 1921 crop in Kansas.

Provision for protection of the Holy Sepulcher against fire has been made by Sir Herbert Samuel, high commissioner for Palestine, says the Palestine weekly.

C. A. Bickett, of Fort William, was appointed secretary of the Grain Inquiry Board as an informal member of members. He has arrived in Winnipeg.

Four men were fined \$200 and costs or thirty days in jail, and three others were remanded on charges of disorderly conduct arising out of the unemployed demonstration in Toronto.

Sir Edgar Wilson, the high commissioner for South Africa, is in an interview with the London Times.

General Smuts' government has got well into the saddle and already had done much to unite the people.

Osungwak, the Eskimo murderer, who, to secure a wife, killed two of his fellow tribesmen, has escaped from the Mount Peel at Western Island, and is now at large in the Arctic region.

Watering Farm Horses

Working Horses are Frequently Neglected, Which Leads to Serious Results.

Water Moore, a well-known writer, says:—
"It is a common thing for farmers to water their horses in the hay field from morning to night, watering them only at noon. This is done even on days of excessive heat. The driver usually has two or more refreshing drinks in the middle of the morning and again in the afternoon, but the horses, who are equally as thirsty, go without. This want of water is not only excessive, but it causes the horses to drink to excess at noon, and again at night, which often results in colic, and always tends to produce a distended stomach of what farmers call a 'boy belly.' Farmers who would treat their horses humanely should take water into the field to keep them cooler."—Boston Work Horse Relief Association.

THE FATEFUL YEARS FOR EVERY WOMAN

How to Overcome Troubles That Afflict Women Only.

So far as a woman's health is concerned, probably the most fateful years of her life are those between 45 and 50. Many women enter this period under depressing conditions, through overstrain in household care, or a neglected condition of the blood, and so they suffer heavily. Amongst the commonest symptoms of this time are headaches, fainting in the back and sides, fever flashes, palpitation, dizziness and depression. It is well to know that these indications of health can be relieved by home treatment. As a tonic for the blood and nerves, Dr. Williams' Pink Pills are already well known to the women who take them at this time. An average of 25¢ from Dr. Williams' Pink Pills is Mrs. J. A. McQuillan, Bayreuth, N.S., who says: "I was greatly troubled with nervousness, palpitation, dizziness, and depression, a generally run down condition. It was only with difficulty that I could do my work, and although I had been taking medicine for some time I did not feel any better. I was then advised Dr. Williams' Pink Pills, and I got a reply and began taking them. The result more than met my expectations, and I am feeling better than I have for many years. In my case the pills certainly did what you claim for them."

Dr. Williams' Pink Pills are sold by all druggists in medicine, or you can get them by mail from Dr. Williams' Medicine Co., Brockville, Ont.

London maintains a laundry school, where girls are taught the true art of washing clothes.

Minard's Liniment used by Physicians.

Poland claims to have the Oldest Maid in Central Europe.

Poland claims the oldest spinster in Central Europe. She is Miss Anna Dobek, living in Chocholow, who recently celebrated her 123rd birthday. Miss Dobek is still quite active, physically and mentally, and does some housework each day.

She also has a sense of humor, and to her acquaintances attributes her longevity to the fact that she has never been bothered by having a man about the house. Miss Dobek doesn't like cats, either.

Every careful and observant mother knows when her child suffers from colic. She also knows that if it is not remedied he not only suffers much pain but will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They correct the bowels from the system, soothe and soothe effects, so that the child's progress thereafter is painless and satisfying.

Lignite Coal in Western Canada.

The coal produced at the Lignite Utilization plant at Bisset, Sask., will be placed on the Winnipeg market at \$11.50 per ton, according to a statement made recently in the Manitoba Legislative by Hon. T. H. Johnson, attorney-general. If all that is claimed for the briquettes manufactured at the Bisset plant in comparison with the price above quoted should revolutionize the coal trade of Winnipeg.

Direct wireless communication between England and Australia has been successfully effected on the Marconi principle. The distance covered is between 12,000 and 13,000 miles.

The outside walls of many of the houses in Mexico are from three feet to six feet thick to withstand earthquake shocks.

Keep Minard's Liniment in the house.

Creeps Into the System Just Like a Serpent

Like a thief in the night, it steals through the system—brought on by tarth acts. Don't trifle with such a scourge. Time and experience have proved that Catarrhism is a wonderful remedy for all Catarrhal and rheumatic troubles. You don't take any drugs, you just inhale the sweet soothing vapor of Catarrhism which is laden with balsamic essences that heal, relieve and ease the sufferer. To strengthen the throat, to sweeten the breath, to stop nasty discharges, to drive out Catarrh, colds and weakness in the throat, use Catarrhism. Two months' treatment one dollar, smaller size 50¢, all dealers or the Catarrhism Co., Montreal.

To Begin Irrigation Work

To Bring Water to 100,000 Acres in the Lethbridge District.

It is now assured that construction on additional irrigation works to bring water to 100,000 acres in the Lethbridge Northern Irrigation district, will be started on the 1st May. The Legislature of Alberta now in session has unanimously decided to guarantee the necessary finances. The large farming area already under irrigation around Lethbridge has been very profitable. Bonds covering expenditure for the new irrigation area are guaranteed by the province of Alberta will shortly be on the market.

The Dumb Animals

Movement For Greater Kindness to Dumb Animals Is Growing.

The movement to set aside special days for greater kindness to dumb animals is growing. It is a movement that appeals to reason. Go back into childhood and almost anyone recalls a certain pet dog that was as loyal and as true as one could have. What child did not worship the intelligent old horse in grand, father's barn? Who did not have difficulty keeping back the tears when mother read aloud the stories of "Beautiful Joe" and "Black Beauty." Much of the joy of youth is inseparably bound up with dumb animals. Children instinctively are affectionate and kind to dumb-brutes. That is the normal attitude toward them. As we grow older, however, we grow thoughtless and many are unnecessarily cruel to dogs and cats and the beasts of the field and the fowl of the air.

We owe a mighty debt to dumb animals.—Winnipeg Tribune.

Manitoba's Population.

The total population in Manitoba in 1920 was 51,466, according to the annual report of the vital statistics branch of the Provincial Government.

The death rate for the province last year was 12.2 per thousand, a reduction of 2 per thousand over 1919.

Births in 1920 totalled 18,356, against 15,919 during the previous year.

Catarrhal Deafness Cannot be Cured

by local application as they cannot reach the diseased portion of the ear. There is only one remedy for Catarrhal Deafness, and that is to use MICA AXLE GREASE.

Eyelid Embroidery Is A Favored Trimming

By Marie Belmont.

One of the most interesting developments in the adorning of the new spring frocks and suits is the lavish use of eyelid embroidery. It is exceedingly effective, as it permits the use of contrasting fabrics which add much to the beauty of the models. This dress, cut from soft folds of salmon chiffon is partly veiled by cream tulle. The latter richly embroidered with eyelids, is disposed in panels on the front of the dress. The lower part of the corsage is covered with the batiste which is cut in pointed style. A huge sash of chiffon is bowed at the waistline, and the long ends become panels that are much longer than the front of the gown.

Sickening Colamel Not Favored More Agreeable Medicine Described

Colamel and Blue Pills are not used as they once were. When the head aches, when the stomach is upset, when the liver is not working right, don't resort to harsh colic, use a pleasant agreeable remedy like Dr. Hamilton's Pills.

Prominent Western Man Praises Tanlac

G. W. Logan, Peabody, Kansas

"Tanlac has completely restored my health and I feel better than in years," was the straightforward statement made recently by Mr. George W. Logan, of Peabody, Kansas, one of the most prominent stock-dealers in the Middle West.

"It has not only made a new man of me but I have actually gained thirty pounds and feel as well as I ever did in my life. I am telling all of my friends about Tanlac but they can see for themselves what it has done in my case."

"When I began taking Tanlac I was in an awful run-down condition, was away off in weight, felt weak and nervous all of the time and couldn't see."

"My wife was also troubled with indigestion at times and it relieved her the same way. You may publish my statement wherever you like and if anyone doubts it, just tell them to see me."

Hands Across the Sea

Forget Minor Differences of View and of Prejudices.

In the hands of the American and of the English people like the security and well-being of the human race. If Great Britain and America, whose ideals we firmly believe to be fundamentally in accord, can, in the next few years, be brought into closer appreciation, each as to the other's difficulties and problems; if they can be persuaded to forget minor differences of view and of prejudices; if they can grow to a common understanding of their mutual obligations and responsibilities to the world, they can become the leaders along the path of world progress.—New York Post.

Big Sale of Timothy Seed.

Growers of Timothy seed in the Pincher Creek district, Alberta, have recently sold 50,000 pounds of seed to a Chicago firm. The price paid was from 55¢ to 60¢ cents per pound.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mosler Grains' Worm Exterminator, an excellent remedy.

Some Yield

An acre of ground planted with bananas will, it is estimated, produce nearly 20 tons of fruit, as each bunch of bananas weighs from 70 to 80 pounds.

Satisfaction in both Cans

Imperial Mica Axle Grease contains just enough powdered mica to form a smooth, hard surface on the axle which relieves friction and enables grease to do its work better. It prevents hot boxes and scored axles, and outlasts other greases two to one.

Imperial Eureka Harness Oil penetrates every fibre of leather, excluding moisture, dust and sweat. It preserves harness, and prevents cracking and breaking of stiles. Harness that is treated with it lasts for years, looks well all the time and requires little repairing.

Ask your nearest dealer about these two high quality products. He has both in convenient tins.

"Peace Hath Her Battlers,
No Less than War."

Renew Your Membership In The RED CROSS

During the war everybody gave to the Red Cross. In these Western Provinces, hundreds of thousands of citizens joined in the greatest flood of gifts ever poured through a single voluntary organization.

Because the need was vital, the emergency ever pressing, there was little formality of membership. Everybody belonged to and was a part of the war-time organization of the Red Cross.

Red Cross now has peace-time duties just as important to humanity as its greatest service of devotion in time of war. The Red Cross Societies of the world have leagued together in a broad-gauge, carefully planned continuous campaign—

For the Improvement of Health, the Prevention of Disease and the Mitigation of Suffering Throughout the World.

This work is to be carried out at home, right here in our own country by our own Red Cross and simultaneously in every one of the thirty-one countries associated in the World League of Red Cross Societies. The Red Cross peace-time crusade for good health is separate and distinct from the war work of the Red Cross or the great task that it is still carrying on, growing

out of its care of those who suffered in the war. To endorse, support and carry on its peace programme the Red Cross asks the approval of every citizen through the enrollment of his or her individual membership. The Membership Fee is \$1.00 per year. The payment of this dollar when you enroll your name is all the money the Red Cross is asking of you.

Enroll

As the outward and visible sign of your faith in the Red Cross, your participation in its good work, your support of its world-wide mission for the improvement of conditions under which humanity lives.

Enrolment Dates, June 5th-11th
